

Applications of Psychology and Economics – Econ 219B
Spring 2019
Wednesday 12-3, 639 Evans Hall

Instructor: Stefano DellaVigna, 515 Evans Hall
sdellavi@econ.berkeley.edu

Syllabus

Features of this course

This course is the continuation of the 219A class in *Psychology and Economics – Theory*, taught by Dmitry Taubinsky. As in 219A, we will keep emphasizing the psychological evidence as the basis for sound economic analysis. We will also insist on the importance of neoclassical theory as a successful benchmark that you are required to know. Finally, several topics of this course are designed to be the empirical counterpart of the theory covered in 219A.

There are two main differences between 219A and 219B. First, this class has largely an empirical orientation, as opposed to the mostly theoretical orientation of 219B. I will present empirical papers drawn from a variety of fields (here in alphabetical order): asset pricing, corporate finance, consumption, development economics, environmental economics, health economics, industrial organization, labor economics, political economy, and public economics. As such, the class is also meant for applied students that do not intend to make Psychology and Economics one of their main fields, but want to apply a behavioral idea to their field of interest.

The second main feature of the course will be its emphasis on dissertation writing. Throughout the course I will do my best to point out what seem to me like good directions for research in behavioral economics. In addition, as an incentive to get you started, one of the requirements of the course is a paper on an applied topic using field data.

The 219B course also covers a set of Methodological Topics, including some of the how-to-do list for empirical behavioral research. In particular we are going to emphasize the theme of Structural Behavioral Economics, or model-based empirical research in behavioral economics. The methodological topics are integrated with the other research topics.

Rules of the game

As a general rule, you should have taken the 219A course before you take this course. If you have not, but are interested in taking this course, please come and talk to me. The prerequisites of the 219A course, that is, an understanding of the economics of uncertainty and game theory at the level of 201B, apply to this course as well. In addition, it is important that you have had exposure to econometrics and empirical research. You should be familiar with key econometrics topics, like panel data models, discrete choice models, and the basics of maximum likelihood and minimum distance estimation. Although it is not a requirement for this course, I recommend taking at least one labor economics, public economics, or applied econometrics course to anyone contemplating doing empirical research.

Throughout the course, I will assign two to four required readings each week. The required readings are starred in the reading list below. The non-starred readings are optional, but I suggest that you at least read the introduction. So much of a paper is in the introduction (if the introduction is well-written).

There are four requirements for the course: problem sets, a final exam, an empirical problem set, and an empirical paper. The last two requirements are either/or, that is, you can do either the empirical problem set or the paper.

Problem Sets. The problem sets will test your knowledge of modeling and of empirical specifications. The problem sets will be on Present-Biased Preferences, Reference Dependence, on Structural Behavioral Economics, and on Behavioral Finance. The first three problem sets include some instances of structural estimation.

Exam. The in-class exam will cover the material of the whole class and will be modeled on the type of questions that I ask in the problem sets. You will have some previous exams to practice.

Empirical Paper. I encourage everyone to try to write an empirical paper on a Psychology and Economics topic. This will help you to get started on your research, which of course is the ultimate purpose of taking a PhD. The paper can be written with up to two other students in the class. A two-page written proposal is due after Spring Break. The final 10-15 page paper is due on May 17.

The **ideal** paper contains a novel idea, the empirical strategy, and preliminary empirical results. Realistically, you can do significantly less as long as you show significant effort. Two things are key: (i) that you do at least some preliminary analysis with data, since one purpose of the requirement is to make sure that you learn to use Stata or another statistical package; (ii) that you use field data, as opposed to experimental data. (This is by no means meant as a negative on doing lab experiments. Laboratory experiments are great. However, this class focuses on field data) Replication of existing studies is perfectly fine, and encouraged. Replication, in fact, is a good way to start original research, and more and more replication data sets are available on the AER, JPE, and QJE websites. Some of the papers prepared for this class in past years have turned into publishable papers and, in one case, even into a job market paper. I encourage you therefore to think of presenting the paper that comes out of this class in the Psychology and Economics Friday Lunch.

In any case, you are strongly encouraged to attend the Psychology and Economics Friday lunch (meeting on most Fridays 12-1 at Haas) if you are interested in making Psychology and Economics one of your fields. In addition, you should attend the Psychology and Economics Seminar (Tu 2-3.30) as much as you can. Spots for students to go for lunch with outside speakers are available for sign-up.

Empirical Problem Set. The alternative assignment is a one-time, significant empirical problem set that is meant to familiarize you with empirical research in Psychology and Economics. You can work on the assignment in groups of up to three people, but each one should hand in a solution.

The course webpage is an important instrument for this course (you can find the link from my webpage). On the website you will find updated lists of readings, the assignments, and the revised lecture notes in pdf format.

Grading. The final grade will be an average with weight 30% on the problem sets, 40% on the final (in-class) exam, and the remaining 30% on either the paper or empirical problem set.

Meeting. The best way to meet is to send me an email to schedule – in fact, you are supposed to email me so we can talk about your paper project.

Schedule of classes

The schedule will vary somewhat as the class unfolds. The syllabus will be updated periodically on the course webpage.

Part I -- Non-Standard Preferences

January 23 – Lecture 1

Introduction

Psychology and Economics: The Methodologies

Psychology and Economics: The Fields

Present-Biased Preferences, Part 1

Status-Quo in Financial Decisions

Methodological Topic: Reading the Psychology Journals

Problem Set 1 on Present-Biased Preferences assigned

January 30 – Lecture 2

Present-Biased Preferences, Part 2

Present-Bias and Status Quo

Consumption Choices: Investment Goods

Homework Completion

Exercise

Problem Set 1 on Present-Biased Preferences due

February 6 – Lecture 3

Present-Biased Preferences, Part 3

Consumption Choices: Investment Goods

Job Search

Work Effort

Delay with Deadline

Consumption Choices: Leisure Goods

Credit Card Borrowing

Consumption-Savings

Drinking

Methodological Topic: Commitment Field Experiment Designs

Problem Set 2 on Reference Dependence assigned

February 13 – Lecture 4

Present-Biased Preferences, Part 4

Laboratory Evidence

Methodological Topic: Common Errors in Applying Present-Biased Preferences

Reference Dependence, Part 1

Housing Market

Bunching-Based Evidence:

February 20 – Lecture 5

Reference Dependence, Part 2

Bunching-Based Evidence:

Taxes

Running

Mergers

Job Search

Daily Labor Supply

Employment and Effort

Domestic Violence

Problem Set 2 on Reference Dependence due

February 27 – Lecture 6

Reference Dependence, Part 3

Golf

Job Search

Applications with Full Prospect Theory

Insurance Choices

Equity Premium

Reference Points: Forward vs. Backward

Endowment Effect

Effort

March 6 – Lecture 7

Social Preferences, Part 1

Wave I: Altruism

Altruism within Workplace

Shaping Social Preferences

Wave II: Warm Glow and Charitable Giving

Wave III: Inequity Aversion and Reciprocity

Workplace Effort

Methodological Topic: Running a Field Experiment

March 13 – Lecture 8

Social Preferences, Part 2

Wave III: Inequity Aversion and Reciprocity

Gift Exchange in the Lab and Field

Wave IV: Social Pressure, Signaling, and Social Norms

Social Pressure, Various

Social Pressure and Charitable Giving

Week of March 20 – Meet Stefano to discuss paper topic

Part II -- Non-Standard Beliefs

March 20 – Lecture 9

Social Preferences, Part 3

Wave IV: Social Pressure, Signaling, and Social Norms

Social Signaling

Social Norms

Non-Standard Beliefs

Overconfidence

Law of Small Numbers

Projection Bias

Problem Set 3 on Structural Behavioral assigned

March 27– Spring Break – No Lecture

Part III -- Non-Standard Decision-Making

April 3 – Lecture 10

Limited Attention

Introduction/Model

Shipping Costs

Taxes

Left-Digit Inattention

Financial Market Evidence

Methodological Topic: Portfolio Methodology

Framing

Menu Effects

Choice Avoidance

Preference for Familiar

Two-page proposal due

April 10 – Lecture 11

Menu Effects

Preference for Salient

Confusion

Choice of Dominated Options

Mental Accounting

Persuasion

Emotions: Mood

Emotions: Arousal

Problem Set 3 on Structural Behavioral due

Problem Set 4 on Behavioral Finance, Assigned

Part IV – Market Response to Biases

April 17 – Lecture 12

Happiness

Market Reaction to Biases, Part 1

Behavioral IO

Behavioral Firms

Methodological Topic: Markets and Non-Standard Behavior

April 24 – Lecture 13

Methodological Topic: Structural Behavioral Economics

Market Reaction to Biases, Part 2

Behavioral Finance

Behavioral Corporate Finance
Behavioral Political Economy
Behavioral Finance
Problem Set 4 on Behavioral Finance due
Empirical Problem Set Handed Out

May 1 – Lecture 14 and last
Market Reaction to Biases, Part 3
Behavioral Labor
Behavioral Welfare Economics
Additional Topics
Conclusion

In-Class Exam (during RRR period), May 8, 12-3

Friday May 17 (midnight) – Due date to email Paper and Empirical Problem Set

Readings

*designates required readings.

The following paper will cover, in a dense manner, the topics covered in the class:

* DellaVigna, Stefano. 2009. "Psychology and Economics: Evidence from the Field," *Journal of Economic Literature* 47(2): 315-372.

The following chapter also touches on many of the topics we cover in class:

* DellaVigna, Stefano. 2018. "Structural Behavioral Economics," *1st Handbook of Behavioral Economics* (eds Douglas Bernheim, Stefano DellaVigna, David Laibson).

The *1st Handbook of Behavioral Economics* (eds Douglas Bernheim, Stefano DellaVigna, David Laibson), Volume 1 and Volume 2 contain many useful chapters of reference, which I will refer to.

The following older articles provide partial overviews of the field of Psychology and Economics:

Rabin, Matthew. 1998. "Psychology and Economics," *Journal of Economic Literature* 36(1): 11-46.

An early classic, emphasizes the psychology and its application to economics

Camerer, Colin. 2005. "Behavioral Economics," Chapter 7 of R. Blundell, W.K. Newey, and T. Persson (eds.), *Advances in Economics and Econometrics: Theory and Applications, Ninth World Congress of the Econometric Society*, Cambridge University Press, pp. 181-214.

Not comprehensive, but interesting ideas on the field

Mullainathan, Sendhil and Richard H. Thaler. 2001. "Behavioral Economics" in *International Encyclopedia of Social Sciences*, Pergamon Press, 1094-1100.

Classifies most P&E into Bounded Self-Control, Bounded Rationality, and Bounded Self-Interest

For those looking for a background book in social psychology to complement the content of the Psychology and Economics sequence, I highly recommend:

Ross, L. and R.E. Nisbett (1991) *The Person and the Situation*, McGraw-Hill.

A primer into a number of important social psychology findings, a wonderful classic, just recently was re-printed.

Kahneman, D., Paul Slovic, and Amos Tversky (1982) *Judgment Under Uncertainty: Heuristics and Biases*, Cambridge University Press.

A classic of the cognitive psychology literature.

Part I -- Non-Standard Preferences

Lecture 1

Status-Quo Bias in Financial Decisions

* Madrian, Brigitte C. and Dennis F. Shea. 2001. "The Power of Suggestion: Inertia in 401(k) Participation and Savings Behavior." *Quarterly Journal of Economics* 116(4): 1149-1187.

Choi, James J., David Laibson, Brigitte C. Madrian and Andrew Metrick. 2006. "Saving for Retirement on The Path of Least Resistance," Chapter 11 in Ed McCaffrey and Joel Slemrod (eds.), *Behavioral Public Finance: Toward a New Agenda*, New York: Russell Sage Foundation, pp. 304-351.

* Carroll, Gabriel D., James J. Choi, David Laibson, Brigitte Madrian and Andrew Metrick. 2009. "Optimal Defaults and Active Decisions." *Quarterly Journal of Economics* 124(4): 1639-1674.

Cronqvist, Henrik and Richard H. Thaler. 2004. "Design Choices in Privatized Social-Security Systems: Learning from the Swedish Experience." *American Economic Review Papers and Proceedings* 94(2): 424-428.

* Chetty, Raj, John N. Friedman, Soren Leth-Peterson, Torben Heien Nielsen, and Tore Olsen. 2014. "Active vs. Passive Decisions and Crowd-out in Retirement Savings Accounts: Evidence from Denmark." *Quarterly Journal of Economics* 129(3): 1141-1219.

Beshears, John, James Choi, David Laibson, and Brigitte C. Madrian. 2018. "Behavioral Household Finance" in *Handbook of Behavioral Economics* Vol 1.

Comparison to Effect of Financial Education

Duflo, Esther and Emmanuel Saez. 2003. "The Role of Information and Social Interactions in Retirement Plan Decisions: Evidence from a Randomized Experiment." *Quarterly Journal of Economics* 118(3): 815-842.

Lecture 2

Status-Quo Bias in Financial Decisions, Explained with Present Bias

* Ericson, Keith Marzilli and David Laibson. 2019. "Intertemporal Choice", *Handbook of Behavioral Economics*, Elsevier, Volume 2.

* O'Donoghue, Ted and Matthew Rabin. 2001. "Choice and Procrastination," *Quarterly Journal of Economics* 116(1): 121-160.

O'Donoghue, Ted and Matthew Rabin. 1999. "Doing It Now or Later." *American Economic Review* 89(1): 103-124.

O'Donoghue, Ted and Matthew Rabin. 1999. "Procrastination in Preparing for Retirement," Chapter 4 of Henry Aaron (ed.), *Behavioral Dimensions of Retirement Economics*, The Brookings Institution.

* DellaVigna, Stefano. 2018. "Structural Behavioral Economics," *1st Handbook of Behavioral Economics* (eds Douglas Bernheim, Stefano DellaVigna, David Laibson).

Other Default Effects

* Handel, Ben. 2013. "Adverse Selection and Inertia in Health Insurance Markets: When Nudging Hurts." *American Economic Review* 103(7): 2643-2682.

Present-Biased Preferences: Investment Goods

Ariely, Dan and Klaus Wertenbroch. 2002. "Procrastination, Deadlines, and Performance: Self-Control by Precommitment." *Psychological Science* 13(3): 219-224.

* DellaVigna, Stefano and Ulrike Malmendier. 2006. "Paying Not To Go To the Gym." *American Economic Review* 96(3): 694-719.

Acland, Dan and Matthew Levy. 2015. "Naiveté, Projection Bias, and Habit Formation in Gym Attendance." *Management Science* 61(1): 146-160.

DellaVigna, Stefano and Daniele Paserman. 2005. "Job Search and Impatience", *Journal of Labor Economics*, Vol. 23, pp. 527-588.

Lecture 3

Present-Biased Preferences: Investment Goods II

* Kaur, Supreet, Michael Kremer and Sendhil Mullainathan. 2015. "Self-Control at Work." *Journal of Political Economy*.

Present-Biased Preferences: Leisure Goods

* Ausubel, Lawrence. 1999. "Adverse Selection in the Credit Card Market." Working Paper, University of Maryland, June.

* David Laibson, Andrea Repetto and Jeremy Tobacman. 2007. "Estimating Discount Functions from Lifecycle Consumption Choices." Mimeo.

Laibson, David. 1997. "Golden Eggs and Hyperbolic Discounting." *Quarterly Journal of Economics* 112(2): 443-477.

Ashraf, Nava, Dean Karlan, and Wesley Yin. 2006. "Tying Odysseus to the Mast: Evidence from a Commitment Savings Product in the Philippines." *Quarterly Journal of Economics* 121(2): 635-672.

* Schilbach, Frank. Forthcoming. "Alcohol and Self-Control: A Field Experiment in India." *American Economic Review*.

Methodology: Design of Commitment Field Experiments

Giné, Xavier, Dean Karlan, and Jonathan Zinman. 2010. "Put Your Money Where Your Butt Is: A Commitment Contract for Smoking Cessation." *American Economic Journal: Applied Economics* 2(4): 213-235.

Royer, Heather, Mark Stehr, and Justin Sydnor. 2015. "Incentives, Commitments, and Habit Formation in Exercise: Evidence from a Field Experiment with Workers at a Fortune-500 Company." *American Economic Journal: Applied Economics* 7(3): 51-84.

Beshears, John, James Choi, David Laibson, Brigitte Madrian, Sakong, 2011. "Self control and liquidity: How to design a commitment contract" Working paper.

Chow, Vinci. 2011. "Demand for a Commitment Device in Online Gaming." Working paper, Chinese University of Hong Kong.

Lecture 4

Present-Biased Preferences: Evidence from the Laboratory

Benhabib, Jess, Alberto Bisin, and Andrew Schotter. 2010. "Present-bias, Quasi-hyperbolic Discounting, and Fixed Costs." *Games and Economic Behavior* 69(2): 205-223.
