

POLITICAL ECONOMICS (ECON 215A).

Fall 2014

Instructor: Gérard Roland

This course has been reorganized relative to earlier years. I still make use a lot of the book by T. Persson and G. Tabellini “Political Economics. Explaining Economic Policy”, MIT PRESS 2000 which synthesizes the large literature that has been growing analyzing the interaction between economic and political processes. However, I have reorganized the course in a way that I think is better, following less individual chapters but organized more by class of models when appropriate.

Students are supposed to do the problem sets after each lecture. The exam will be based on problem sets.

Lecture 1. From Social Choice to Political Economics.
